Pet Defence
Luxury Foam Carpet Underlay

RESIDENTIAL UNDERLAY

What makes Pet Defence® special?

The breathable moisture barrier on Pet Defence® prevents pet accidents and spills from seeping through the underlay and into the subfloor. In turn, this helps reduce the instances of staining and the reappearance of marks.

How does Pet Defence® help reduce pet odours?

No matter how well you clean your home, pet scents, especially those from accidents can linger as they make their way into your underlay and hang around. By reducing the opportunities for these smells to seep into your underlay, Pet Defence® also assists in reducing odours.

Does Pet Defence® work like a normal underlay?

Pet Defence® provides all the standard benefits of carpet underlay in addition to its specialised functions. This means that Pet Defence® works to enhance underfoot comfort, increase the longevity of your carpet and improve the thermal properties of your floor.

How can Pet Defence® help create a healthier indoor environment?

Pet Defence® works in multiple ways to help you create a healthier indoor environment. Its hypoallergenic construction is asthma and allergy friendly which benefits indoor air quality, while the breathable moisture barrier works to prevent pet accidents from creating stains and reappearing marks when cleaned promptly and correctly. Pet Defence® also assists you in creating a healthier indoor environment by reducing the chances of mould and mildew forming beneath the carpet due to the abovementioned spills and accidents. Plus, as Pet Defence® helps quieten noise transmission within your space, you'll benefit from less noise pollution within the home.

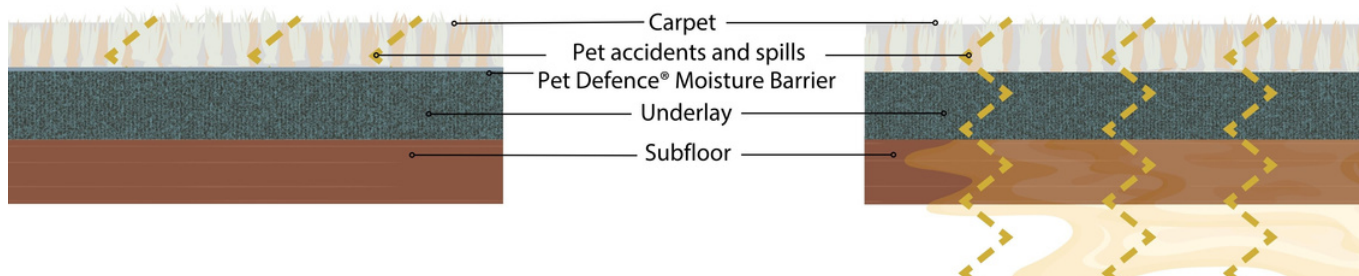

Pet Defence® is a luxury foam underlay which has a hypoallergenic construction and is 100% recyclable. Featuring a breathable moisture barrier designed to make cleaning up pet accidents easier, Pet Defence® can also help reduce staining and odours making it the ideal underlay for those with four-legged family members. In addition to these benefits, Pet Defence® can also help reduce noise transmission within the home, enhance underfoot comfort and improve the thermal properties of your space.

Product Code: 24128

Breathable Moisture Barrier prevents pet accidents and spills from damaging underlay and subfloor.

Pet accidents and spills damage underlay and subfloor causing stains and odours in your space.

Multifunctional benefits

Pet Defence® is designed to provide the ideal underlayment solution for those with four-legged family members. Offering a solution for the prevention of accidents seeping through to your underlay and subfloor, Pet Defence® delivers benefits on multiple fronts including noise transmission and thermal properties.
